MURALIDHAR BADISA

+91 9182974990 | badisa.muralidhar@gmail.com | Hyderabad, Telangana, India

SUMMARY

Software Engineer with experience designing and building scalable full-stack applications, cloud infrastructure, and production-ready systems. Skilled in system design, backend architecture, AI integrations, and DevOps automation using React.js, Flutter, Django, Express.js, Docker, and large language models (LLMs).

PROFESSIONAL EXPERIENCE

Full Stack developer Oct. 2024 – Sep. 2026

Neuxa Global *Hyderabad, India*

- Designed and developed scalable eCommerce and HRMS platforms using Flutter, React.js, Django, and Express.js.
- Built secure REST APIs, authentication systems, RBAC modules, and optimized backend architectures for high availability.
- Designed relational database structures using PostgreSQL and MySQL with performance optimization.
- Implemented Docker-based containerization, CI/CD pipelines using GitHub Actions, and automated workflows.
- Managed Linux server infrastructure, Nginx configurations, reverse proxies, and Proxmox virtualization.

Web Developer & Trainer Intern Feb. 2024 – Aug. 2024

St. Mary's Group of Institutions & DeepThought EduTech *Hyderabad, India*

- Developed MERN stack web applications and reusable frontend components.
- Trained students in full-stack development, React.js, Node.js, and web application best practices.
- Worked on frontend/backend integration, API development, and responsive application design.

TECHNICAL SKILLS

Languages: C++, JS, TS, Java, Python, PHP, Bash, Dart
Frontend/Mobile: React.js, Next.js, Flutter, React Native
Backend & Design: Node.js, Express.js, Django, NestJS, Laravel, REST APIs, RBAC, Distributed Systems
AI & Integration: OpenAI API, LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering
Databases & Caching: PostgreSQL (pgvector), MySQL, MongoDB, Redis, Pinecone
DevOps & Cloud: Docker, GitHub Actions, AWS, GCP, Azure, IBM Cloud, Proxmox
Infrastructure: Linux, Nginx, Apache, Reverse Proxy, VPN, Firewalls, Virtualization, Network Security

PROJECTS

Enterprise AI Knowledge Assistant | *Node.js, LangChain, OpenAI API, PostgreSQL (pgvector)*

- Developed a Retrieval-Augmented Generation (RAG) system to automate internal queries and customer support.
- Integrated OpenAI language models with LangChain and vector databases to deliver context-aware, highly accurate responses based on proprietary company data.

Tastezy - Multi-Vendor eCommerce Marketplace | *Flutter, React, Express.js, PostgreSQL*

- Built a scalable marketplace with dedicated customer, vendor, and admin applications.
- Designed backend architecture, order workflows, and containerized deployment infrastructure.

HRMS - Human Resource Management System | *Django, React.js, PostgreSQL, Docker*

- Developed platform with payroll, attendance, leave management, and RBAC modules.
- Automated deployments using Docker and GitHub Actions CI/CD workflows.

Proxmox-ER605 - Virtualized Infrastructure | *Proxmox, Linux, Nginx, Docker*

- Designed and managed virtualized infrastructure using Proxmox VE and Linux servers.
- Configured reverse proxy, centralized storage, and improved infrastructure reliability and security.

EDUCATION

Sai Spurthi Institute of Technology 2020 – 2024

Bachelor of Technology in Computer Science Engineering *Telangana, India*

CERTIFICATIONS

Cisco Networking Academy: Cybersecurity Essentials
IBM SkillsBuild: Machine Learning with Python, Data Analysis, Cloud Essentials
Red Hat (RHEL): System Administration I (RH124) & II (RH134)
